

## **DRFT-210 TECHNICAL DRAFTING III 4 CREDITS**

### **SYLLABUS**

---

#### **CATALOG DESCRIPTION**

Design and working drawings, detail, subassembly and assembly drawings, and bill of materials are studied. Manufacturing methods and related drawing formats and topics in the mechanical and civil environment will be examined.

Prerequisites: DRFT 115 and Math 160

Semester Offered: Fall

#### ***COMMON STUDENT LEARNING OUTCOMES***

*Upon successful completion of San Juan College programs and degrees, the student will demonstrate competency in...*

##### **BROAD AND SPECIALIZED LEARNING**

Students will actively and independently acquire, apply, and adapt skills and knowledge with an awareness of global contexts.

##### **CRITICAL THINKING**

Students will think analytically and creatively to explore ideas, make connections, draw conclusions and solve problems.

##### **CULTURAL AND CIVIC ENGAGEMENT**

Students will act purposefully, reflectively, and ethically in diverse and complex environments.

##### **EFFECTIVE COMMUNICATION**

Students will exchange ideas and information with clarity in multiple contexts.

##### **INFORMATION LITERACY**

Students will be able to recognize when information is needed and have the ability to locate, evaluate, and use it effectively.

##### **INTEGRATING TECHNOLOGIES**

Students will demonstrate fluency in the application and use of technologies in multiple contexts.

Student work from this class may be randomly selected and used anonymously for assessment of course, program, and/or institutional learning outcomes. For more information, please refer to the Dean of the appropriate School.

#### **COURSE LEARNING OUTCOMES**

*Upon successful completion of the course, the student will be able to...*

1. Understand welding processes, symbols and weldment drawing format.
2. Analyze tolerance studies on complex parts.
3. Study the design process for solving problems.

A copy of this approved syllabus is on file in the dean's office.

Updated 12/14/18

4. 4. Understand belts, chains and gears as power transmission devices.
5. 5. Gain knowledge in bearings, seals and lubricants.
6. 6. Learn techniques used for structural steel detail drawings.
