

VETT 212-SMALL ANIMAL DISEASE & MEDICAL CARE III 2 CREDITS

SYLLABUS

CATALOG DESCRIPTION

An advanced course designed to complete the study of selected specific small animal diseases and the anatomical and physiological basis of the specific diseases that are being presented.

Prerequisites: Student must have clinical site and preceptor approved; faculty permission required

Semester Offered: ALL

COMMON STUDENT LEARNING OUTCOMES

Upon successful completion of San Juan College programs and degrees, the student will demonstrate competency in...

BROAD AND SPECIALIZED LEARNING

Students will actively and independently acquire, apply, and adapt skills and knowledge with an awareness of global contexts.

CRITICAL THINKING

Students will think analytically and creatively to explore ideas, make connections, draw conclusions and solve problems.

CULTURAL AND CIVIC ENGAGEMENT

Students will act purposefully, reflectively, and ethically in diverse and complex environments.

EFFECTIVE COMMUNICATION

Students will exchange ideas and information with clarity in multiple contexts.

INFORMATION LITERACY

Students will be able to recognize when information is needed and have the ability to locate, evaluate, and use it effectively.

INTEGRATING TECHNOLOGIES

Students will demonstrate fluency in the application and use of technologies in multiple contexts.

Student work from this class may be randomly selected and used anonymously for assessment of course, program, and/or institutional learning outcomes. For more information, please refer to the Dean of the appropriate School.

COURSE LEARNING OUTCOMES

Upon successful completion of the course, the student should be able to describe and apply knowledge of the following topics for canine and feline patients:

1. Clinical Nursing Skills: Obtain patient histories and perform physical exams; Perform venipuncture; Perform urinary procedures; Provide basic husbandry care; Administer fluid therapy and medications; Place IV catheters;
2. Diseases: Identify anatomical structures; Explain the function of the components; Describe and identify select diseases; Describe procedures used to diagnose disorders; and List the common medical treatments involving the following systems:
 - a. Reproductive, Cardiovascular, Blood/Immune, Respiratory, Nervous, Urinary, and Digestive.
3. Develop reports on special topics.
