

SAFE-1390 Composite Safety Training

3 CREDITS

SYLLABUS

CATALOG DESCRIPTION

Composite Safety week is comprised of five course topics: Fall Protection/Prevention, SafeLand, First Aid CPR AED Bloodborne Pathogen, Confined space, Hazard Recognition and Mitigation.

Prerequisites: None

Semester Offered: ALL

Common Student Learning Outcomes

Upon successful completion of San Juan College programs and degrees, the student will demonstrate competency in...

BROAD AND SPECIALIZED LEARNING

Students will actively and independently acquire, apply, and adapt skills and knowledge with an awareness of global contexts.

CRITICAL THINKING

Students will think analytically and creatively to explore ideas, make connections, draw conclusions and solve problems.

CULTURAL AND CIVIC ENGAGEMENT

Students will act purposefully, reflectively, and ethically in diverse and complex environments.

EFFECTIVE COMMUNICATION

Students will exchange ideas and information with clarity in multiple contexts.

INFORMATION LITERACY

Students will be able to recognize when information is needed and have the ability to locate, evaluate, and use it effectively.

INTEGRATING TECHNOLOGIES

Students will demonstrate fluency in the application and use of technologies in multiple contexts.

Student work from this class may be randomly selected and used anonymously for assessment of course, program, and/or institutional learning outcomes. For more information, please refer to the Dean of the appropriate School.

Course Learning Outcomes

Upon successful completion of the course, the student will be able to...

1. Implement and apply safe work practices and procedures following OSHA 1910 Subpart D and 1926 Subpart M Standards.
2. Identify hazardous slip, trips, and fall conditions in the work place.
3. Identify and implement Behavior Based Safety utilizing SafeLand Instruction.

4. Recognize and implement Hazard Communication Standards when dealing with hazardous chemicals.
5. Define and utilize Emergency Action Plans.
6. Perform best practices in First Aid, CPR, AED, and Bloodborne Pathogens.
7. Perform a hands-on skills check with the use of CPR and an AED.
8. Identify and mitigate atmospheric and physical hazards associated with Confined Spaces.
9. Differentiate between the types of monitoring devices and utilize them.
10. Utilize best practices and safety precautions using Hazard Recognition and Mitigation.
