

## **ENER 220-WELLSITE PRESSURE AND TEMPERATURE CONTROL 3 CREDITS**

### **SYLLABUS**

---

#### **CATALOG DESCRIPTION**

Course presents basic principles of common types of pressure and temperature controllers found on a wellsite, how they function and their applications. Students will gain an understanding of how to identify symptoms of improper operation, common causes of failures and how to make minor repairs/adjustments. They will also disassemble and assemble several types of controllers to facilitate their understanding of the repair, maintenance and operation of the devices.

Prerequisites: None

Semester Offered: All

#### ***COMMON STUDENT LEARNING OUTCOMES***

*Upon successful completion of San Juan College programs and degrees, the student will demonstrate competency in...*

##### **BROAD AND SPECIALIZED LEARNING**

Students will actively and independently acquire, apply, and adapt skills and knowledge with an awareness of global contexts.

##### **CRITICAL THINKING**

Students will think analytically and creatively to explore ideas, make connections, draw conclusions and solve problems.

##### **CULTURAL AND CIVIC ENGAGEMENT**

Students will act purposefully, reflectively, and ethically in diverse and complex environments.

##### **EFFECTIVE COMMUNICATION**

Students will exchange ideas and information with clarity in multiple contexts.

##### **INFORMATION LITERACY**

Students will be able to recognize when information is needed and have the ability to locate, evaluate, and use it effectively.

##### **INTEGRATING TECHNOLOGIES**

Students will demonstrate fluency in the application and use of technologies in multiple contexts.

Student work from this class may be randomly selected and used anonymously for assessment of course, program, and/or institutional learning outcomes. For more information, please refer to the Dean of the appropriate School.

#### **COURSE LEARNING OUTCOMES**

*Upon successful completion of the course, the student will be able to...*

A copy of this approved syllabus is on file in the dean's office.

Updated 12/14/18

1. Identify common types of pressure and temperature controllers.
2. Describe how valves and controllers function and their purpose.
3. Identify symptoms of improper operation and common causes.
4. Describe and/or demonstrate how to make adjust pressure and temperature controllers.
5. Effectively communicate pressure and temperature controller issues to assist in making repairs.
6. Identify procedures that will ensure data integrity in the tertiary devices and subsequent databases.
7. Proactively identify incorrect measurement equipment and processes.
