Other Classroom Policies and Expectations

The Navajo Language can vary and has "preferences" based on specific regions and/or family/social groups. "Preferences" is when a Navajo word is pronounced in different ways, based on region due to sound in nasal preference or translations. Some regions include Alamo, Canoncito, Tuba City,

Window Rock, Counselor, East and Western Navajo. For example, the word for ice cream, can be 'abe' sik'azí, dah yistin, yas likaní, or 'abe' yistiní. The verb phrase "running" maybe yishwoł, yishtał, or yisht'éeł. Navajo Language has evolved over time and continues to change as the people name and describe what is in their present world (e.g. Science, technology, medicine etc). Keep these considerations in mind as you learn the Navajo language. Remember there is no right or wrong way to pronounce a word due to "Preferences".

Grading

Final grades are calculated based on the following...

Grading

What does it mean to weight a grade? When grades are weighted, some assignments (e.g. Final Assignments) or categories of assignments (e.g. Tests) count more than others.

Why not just assign more points to the things that are harder? In a perfect world this would work. However, there is far more flexibility in weighting grades. If an instructor decides that quizzes should make up 25% of the total points in a course, it doesn't matter whether there is 1 quiz, 5 quizzes or, heaven forbid, 50 quizzes. The total points earned for the quizzes still makes up 25% of the final grade. If an instructor decides to increase or decrease the workload based on the particular needs of any group of students, weighted grades make that easy. In a scenario where grades are weighted by category and the number of assignments in a category changes, no changes to the course points or course guide would be necessary. If, on the other hand, the point system was used, and a change to the course assignments is needed, the total points for the class would change and the course guide would need to be updated.

How are the points for a weighted item calculated? Multiply each score over the total points possible by the weight. For example, the midterm is worth 100 points. If you earned 90/100 the calculation would be $.25(90/100)=.225$. Expressed as a percent, you earned 22.5%

Grading Scale:

A = 90 % or higher

B = 89–80

C = 79–70

D = 69–60

F = 59 or below.

To determine final grades, use the calculations above along with the table below...

Category

Weight

Category	Weight
Navajo Rosetta Stone Log Book	25
Written Journals	15
Review Questions	10
Attendance: In Class Daily Participation	15
Oral Practice with the Navajo Tutor	15
