

SYLLABUS

COURSE # AND TITLE ASEP 175 GM Manual Trans/Transaxle # OF CREDITS 5

CATALOG DESCRIPTION

The theory and repair of GM manual transmissions and transaxles, differentials, clutches, transfer cases and drive axles will be covered. Noise, hard shifting and other common concerns will be addressed. Diagnosis and troubleshooting will be stressed. Safety is emphasized. Corequisites: ASEP-172. Offered: Fall.

Prerequisites: ASEP 160

Common Student Learning Outcomes

Upon successful completion of San Juan College programs and degrees, the student will demonstrate competency in...

BROAD AND SPECIALIZED LEARNING

Students will actively and independently acquire, apply, and adapt skills and knowledge with an awareness of global contexts.

CRITICAL THINKING

Students will think analytically and creatively to explore ideas, make connections, draw conclusions and solve problems.

CULTURAL AND CIVIC ENGAGEMENT

Students will act purposefully, reflectively, and ethically in diverse and complex environments.

EFFECTIVE COMMUNICATION

Students will exchange ideas and information with clarity in multiple contexts.

INFORMATION LITERACY

Students will be able to recognize when information is needed and have the ability to locate, evaluate, and use it effectively.

INTEGRATING TECHNOLOGIES

Students will demonstrate fluency in the application and use of technologies in multiple contexts.

Student work from this class may be randomly selected and used anonymously for assessment of course, program, (www.sanjuancollege.edu/assessment).

GENERAL LEARNING OBJECTIVES

1. To prepare the student with job entry level qualifications in power trains.
2. Completion of 100% of NATEF priority 1 tasks.
3. Completion of 85% of NATEF priority 2 tasks.
4. Completion of 75% of NATEF priority 1 tasks.

SPECIFIC LEARNING OUTCOMES

Upon successful completion of the course, the student will be able to...

1. Demonstrate safe techniques for working on standard transmissions, as well as transaxles.
2. Remove and replace universal joints.
3. Overhaul rear differentials.
4. Replace axle bearings and seals.
5. Diagnose differential failures such as leaks, gear howl, and bearing noises.
6. Replace wheel studs.
7. Disassemble front drive axles.
8. Diagnose transfer cases malfunctions.
9. Diagnose and overhaul manually shifted transmissions and transaxles.
10. Remove and replace clutch and pressure plate assemblies.

11. Remove and replace clutch forks, pilot bearings, and clutch release bearings.
12. Adjust clutch linkage and cables.
13. Diagnose clutch problems.
14. Measure flywheel run-out.
15. Remove and replace manually shifted transmissions.
16. Adjust manual transmission shift linkage or cables
17. Overhaul various manual transmissions.
