Success Matters

AUBO-270-BODY SHOP MANAGEMENT I 4 CREDITS

SYLLABUS

CATALOG DESCRIPTION

This advanced course is designed to simulate an auto body estimator's position. The student will be exposed to a systematic approach to damage analysis as well as cost estimation.

Prerequisites: AUBO 245 and AUBO-255

Semester Offered: Fall, Spring

Common Student Learning Outcomes

Upon successful completion of San Juan College programs and degrees, the student will demonstrate competency in…

BROAD AND SPECIALIZED LEARNING
Students will actively and independently acquire, apply, and adapt skills and knowledge with an awareness of global contexts.

CRITICAL THINKING
Students will think analytically and creatively to explore ideas, make connections, draw conclusions and solve problems.

CULTURAL AND CIVIC ENGAGEMENT
Students will act purposefully, reflectively, and ethically in diverse and complex environments.

EFFECTIVE COMMUNICATION
Students will exchange ideas and information with clarity in multiple contexts.

INFORMATION LITERACY
Students will be able to recognize when information is needed and have the ability to locate, evaluate, and use it effectively.

INTEGRATING TECHNOLOGIES
Students will demonstrate fluency in the application and use of technologies in multiple contexts.

Student work from this class may be randomly selected and used anonymously for assessment of course, program, and/or institutional learning outcomes. For more information, please refer to the Dean of the appropriate School.

Course Learning Outcomes

Upon successful completion of the course, the student will be able to…

1. To expose the student to a systematic approach when generating a damage report.
2. To provide the student with the hands on experience required to summarize all procedures, materials, and parts required in a collision repair.

Specific Learning Outcomes

Upon successful completion of the course, the student will be able to…

1. Explain how damage repair estimates are determined.
2. Identify and explain the most common abbreviations used in collision estimating guides.
3. Make a rough estimate of the time required to refinishing a given collision repair job.
